

Work Package 6: Development of the UK NEA scenarios

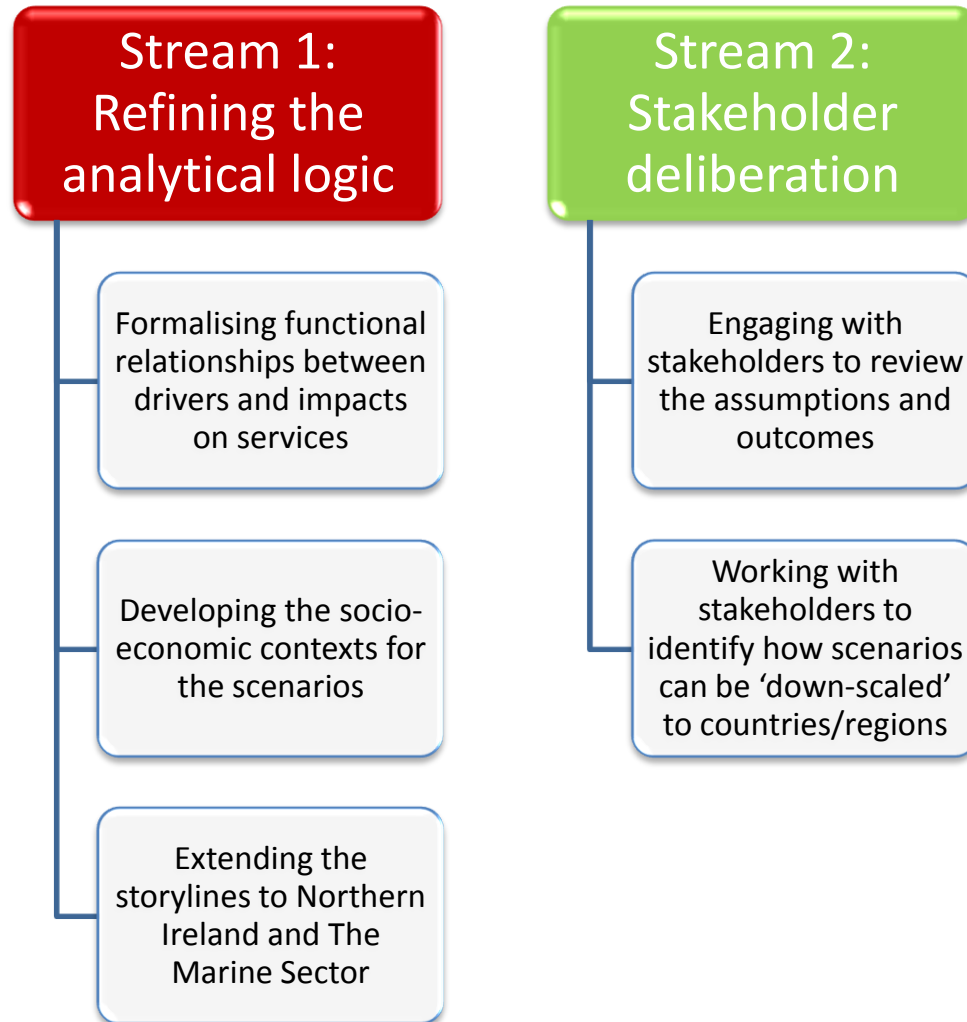

Gary Kass & Roy Haines-Young

**First meeting of the Expert Panel, Stakeholders,
Funders Group and Principal Investigators for the UK
NEA Follow on Project**

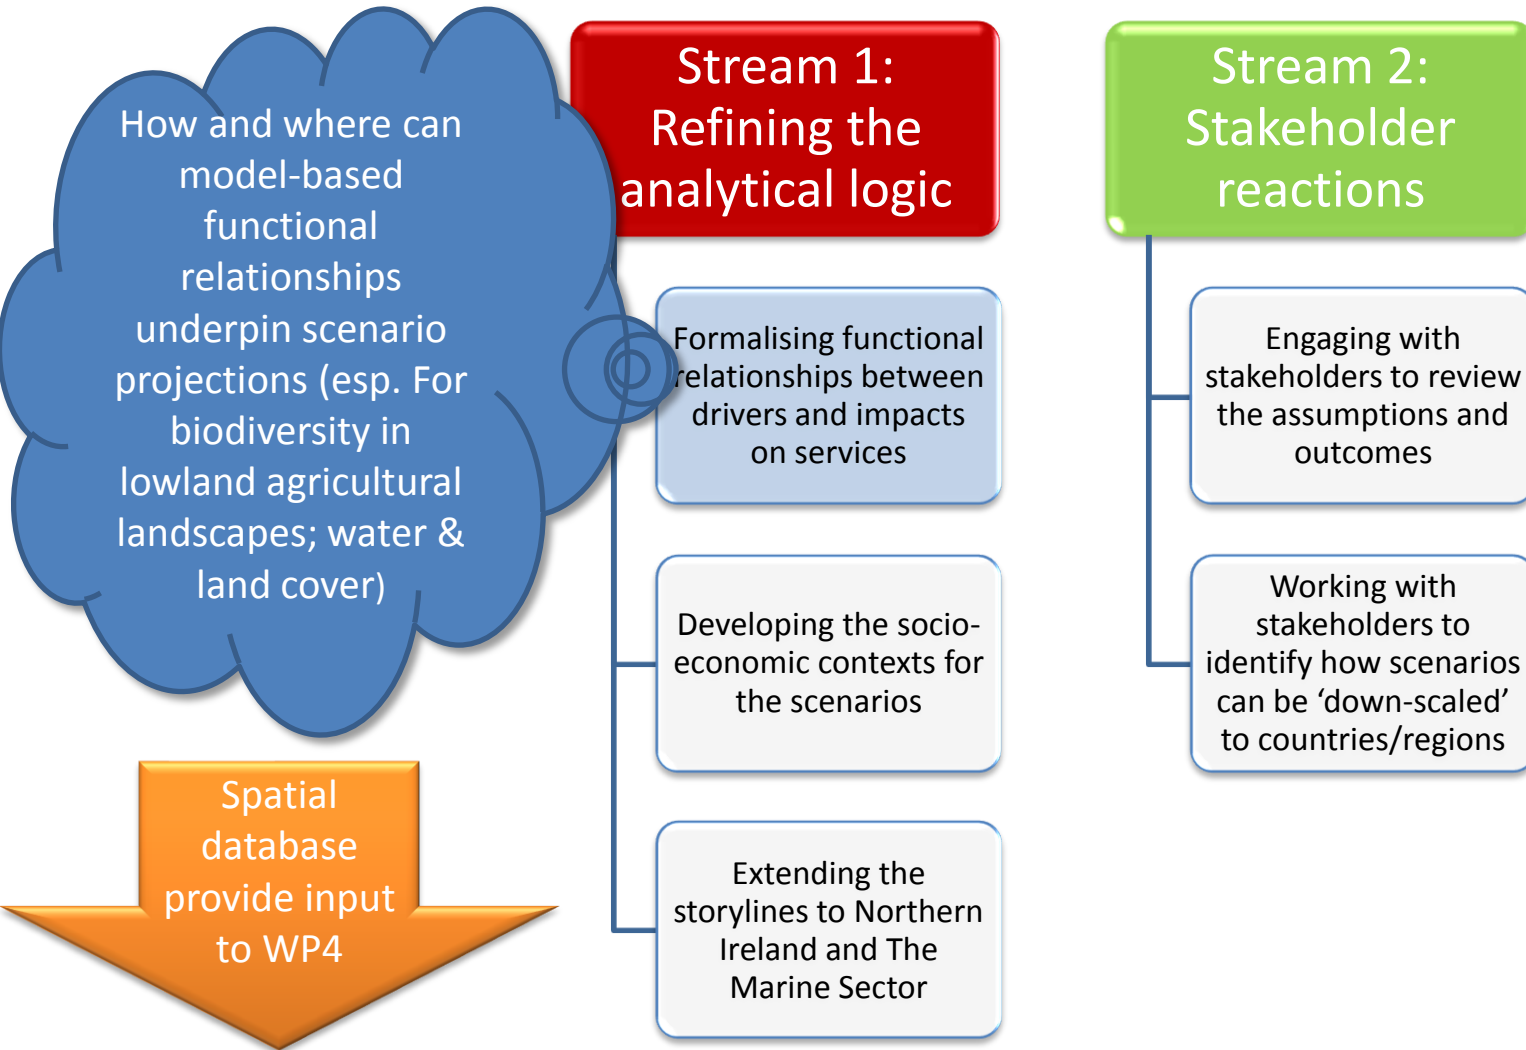

Phase 1 and the Next Steps

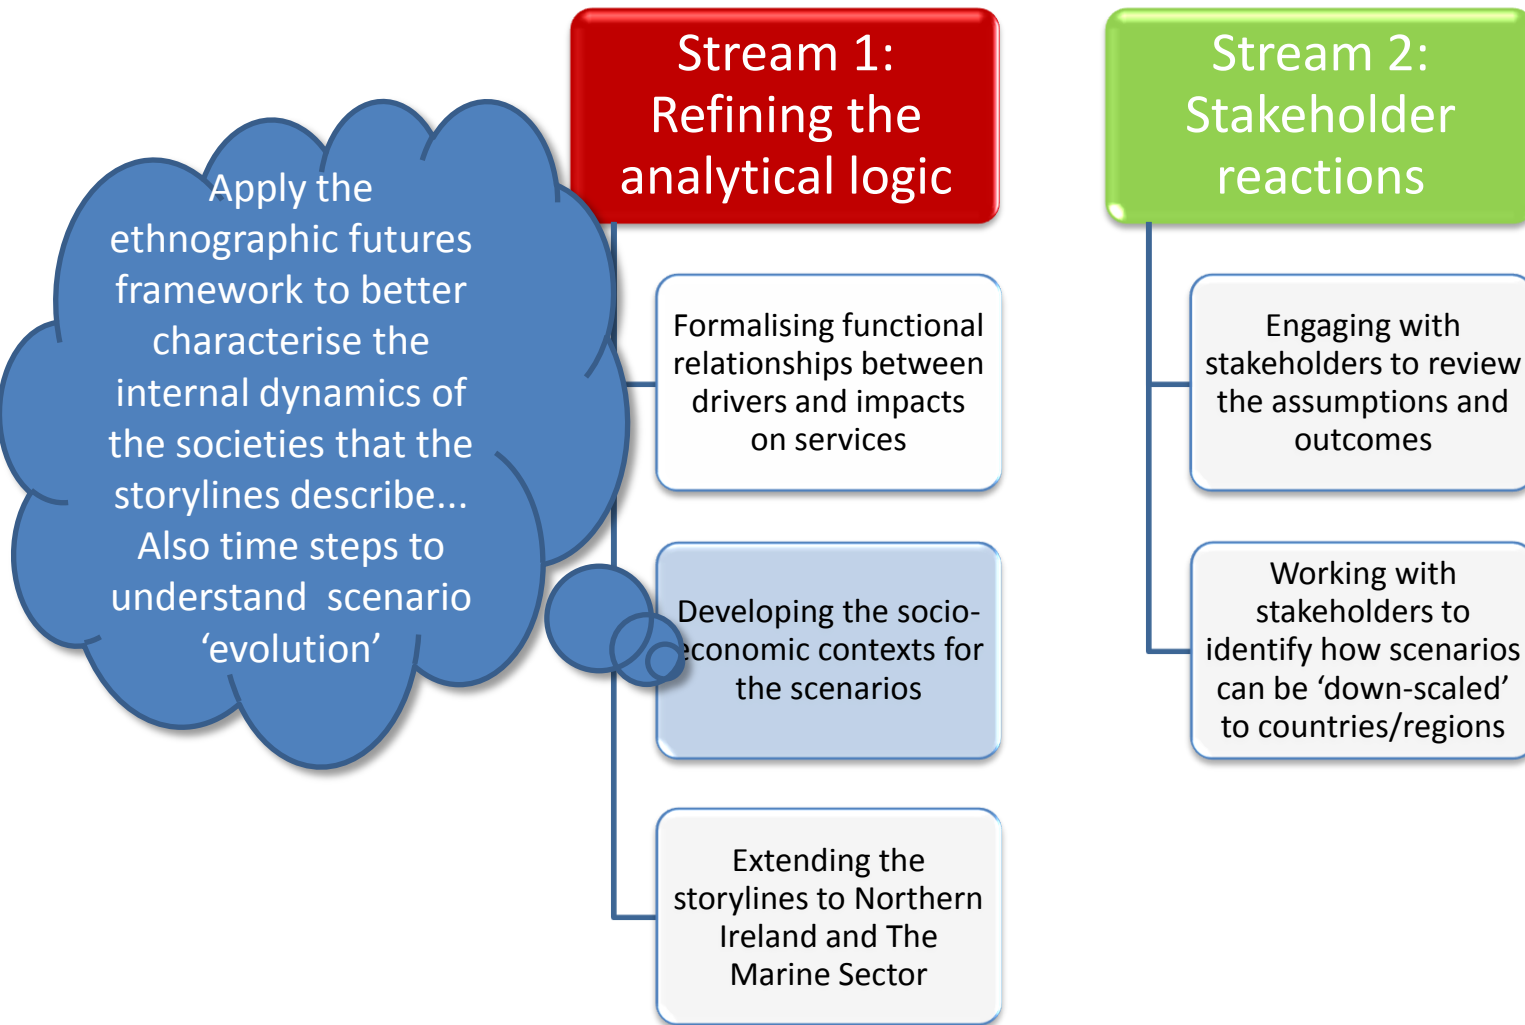

Overview of Proposed Work

Overview of Proposed Work

Overview of Proposed Work

Ethnographic Futures Framework

created by Michele Bowman and Kaipō Lum of Global Foresight Associates

DEFINE: How do we see ourselves and the world? What do we care about?
Social Values & Attitudes; Scientific Models; Culture; Economic Systems; Religion; Politics & Public Policy

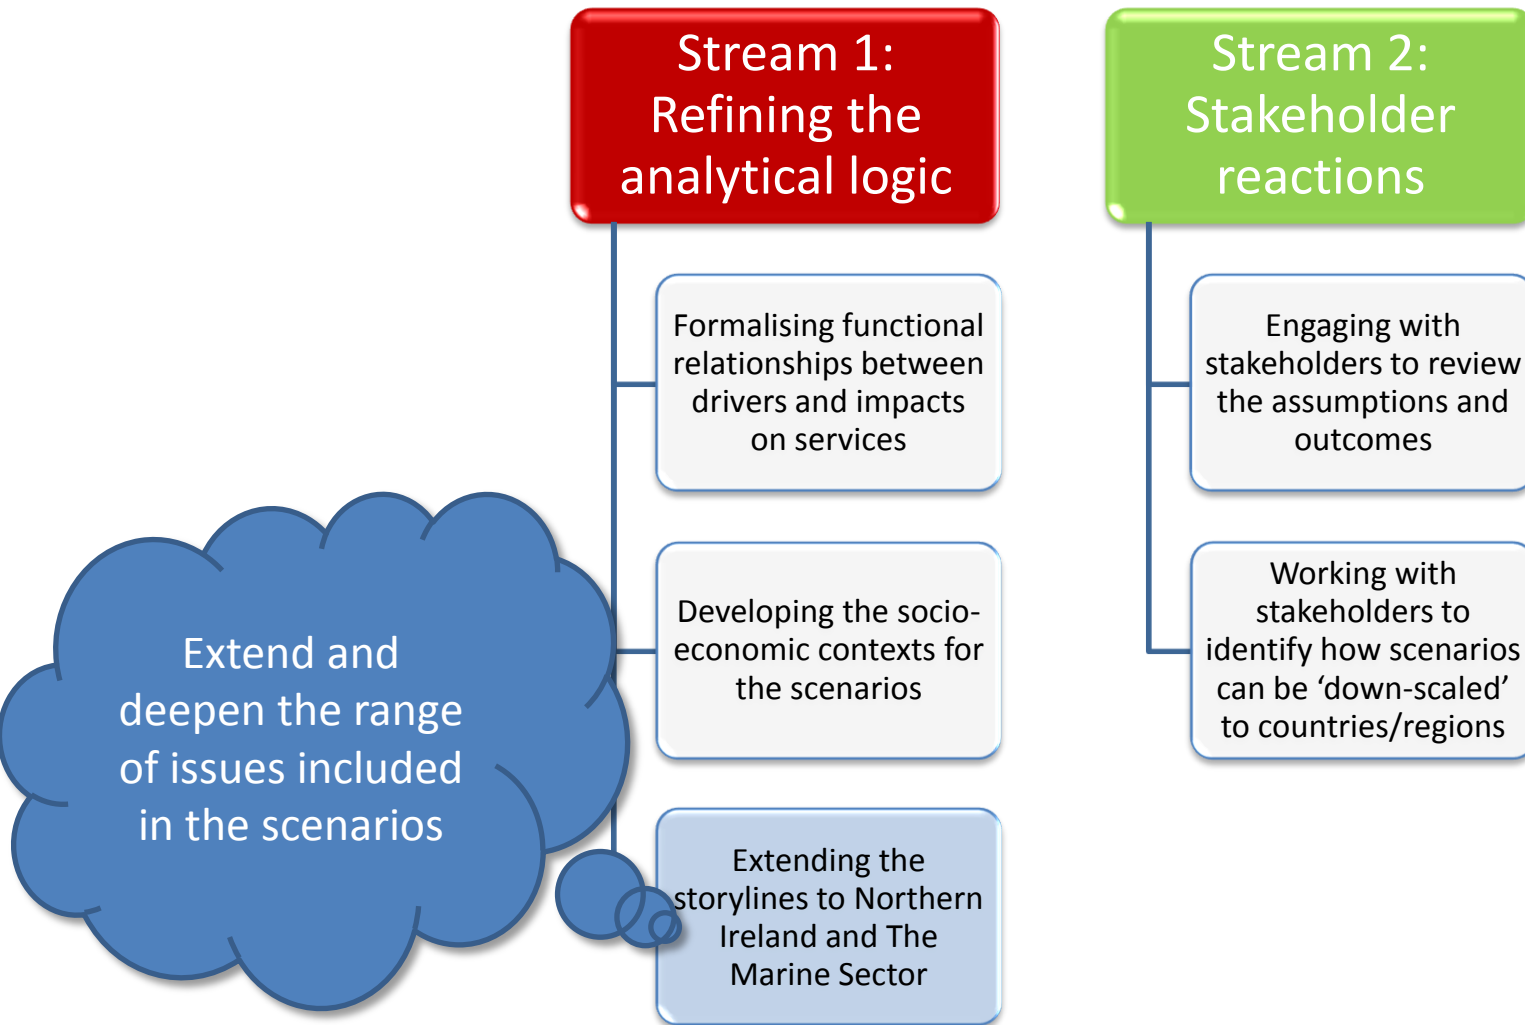

RELATE: What structures and relationships link people, organisations & nature?
Demographics; Social Groups; Work & Economy; Habitat & Ecosystems; Business Models & Practices; Government; Education

CONNECT: How do we connect people, places and things?
Information Technology; Space; Music, Media; Visual Arts; Language

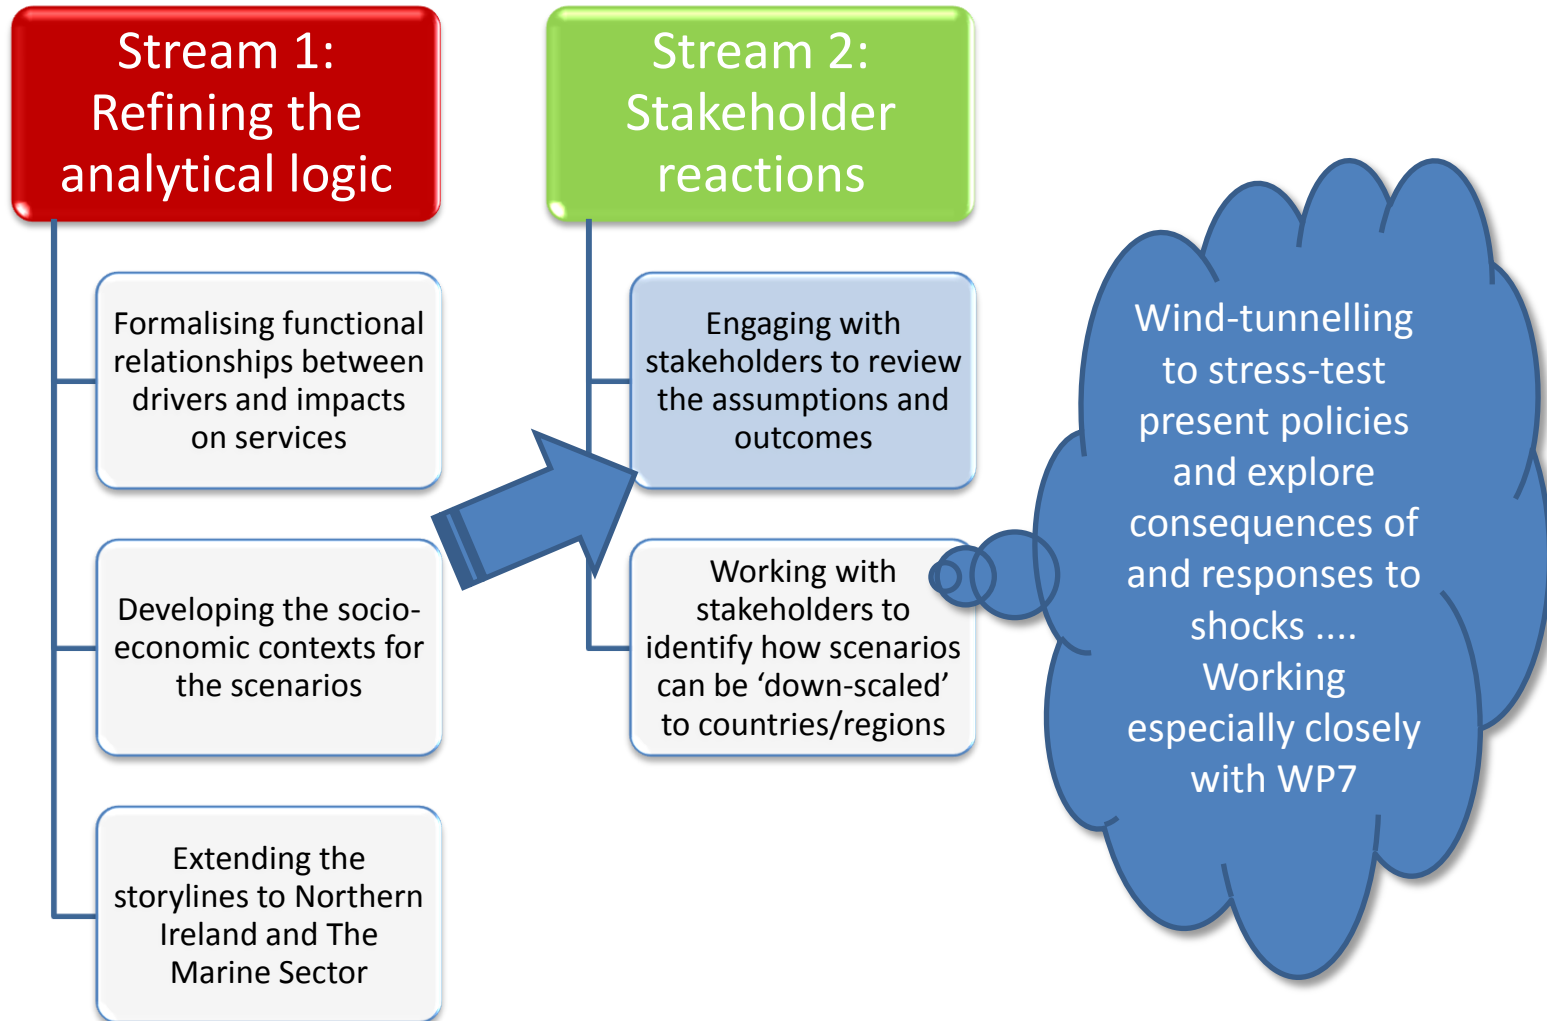

CREATE: How do we create wealth, goods & services?
Engineering; Manufacturing; Innovation Processes; Life Sciences; Materials Sciences; Nanotechnology

CONSUME: What do we create? how do we acquire and use goods & services?
Consumables; Energy; Food; House & Home; Entertainment & Leisure; Healthcare; Natural Resources

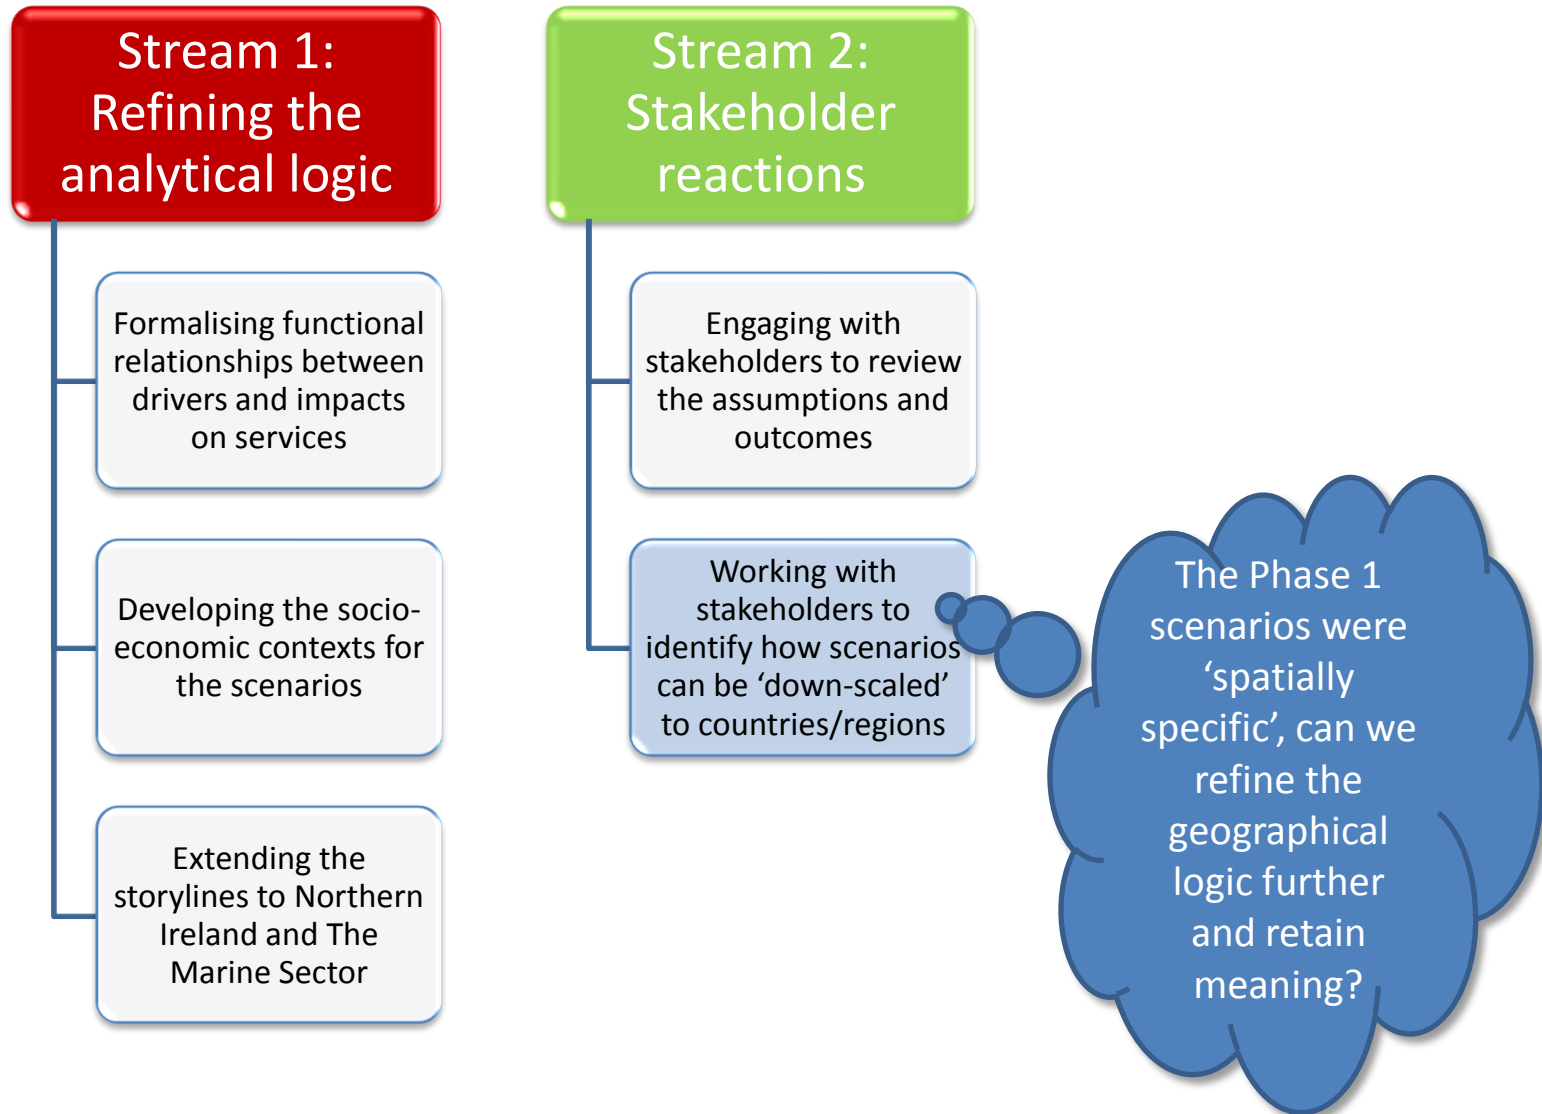

Overview of Proposed Work

Overview of Proposed Work

Overview of Proposed Work

Overview of Proposed Work

Stream 1: Refining the analytical logic

Stream 2: Stakeholder reactions

Joint
Conceptual
work
with WP7

Formalising functional relationships between drivers and impacts on services

Developing the socio-economic contexts for the scenarios

Extending the storylines to Northern Ireland and The Marine Sector

Engaging with stakeholders to review the assumptions and outcomes

Working with stakeholders to identify how scenarios can be 'down-scaled' to countries/regions

Joint workshops etc.
with WP7

The Phase 1 scenarios were 'spatially specific', can we refine the geographical logic further

Outcomes

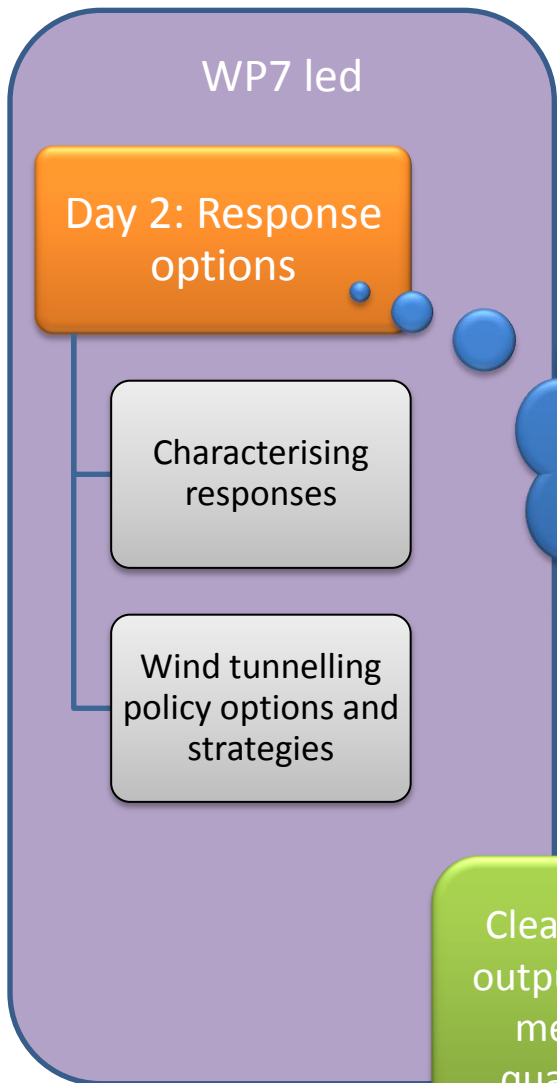

- **More robust and resonant descriptions of the scenarios**
 - Model based interactions (1st outputs Autumn 2012)
 - Time-lines and spatial frameworks (1st outputs Autumn 2012)
 - Further deepening and refinements through 2nd stream (Spring 2013)
- **Stakeholders get to grips with understanding and using the scenarios**
 - Framework for analysis of response options (materials and methods) ----->feed into WP7 (outputs Autumn 2012]
 - Analyse and report on extent of transformative thinking (based on qualitative analysis with stakeholders - outputs will inform methodological discussion about their value– by assessing their quality by *'usefulness'*) (Spring 2013).

Possible Workshop Structure

Stakeholder perceptions and views on scenarios before

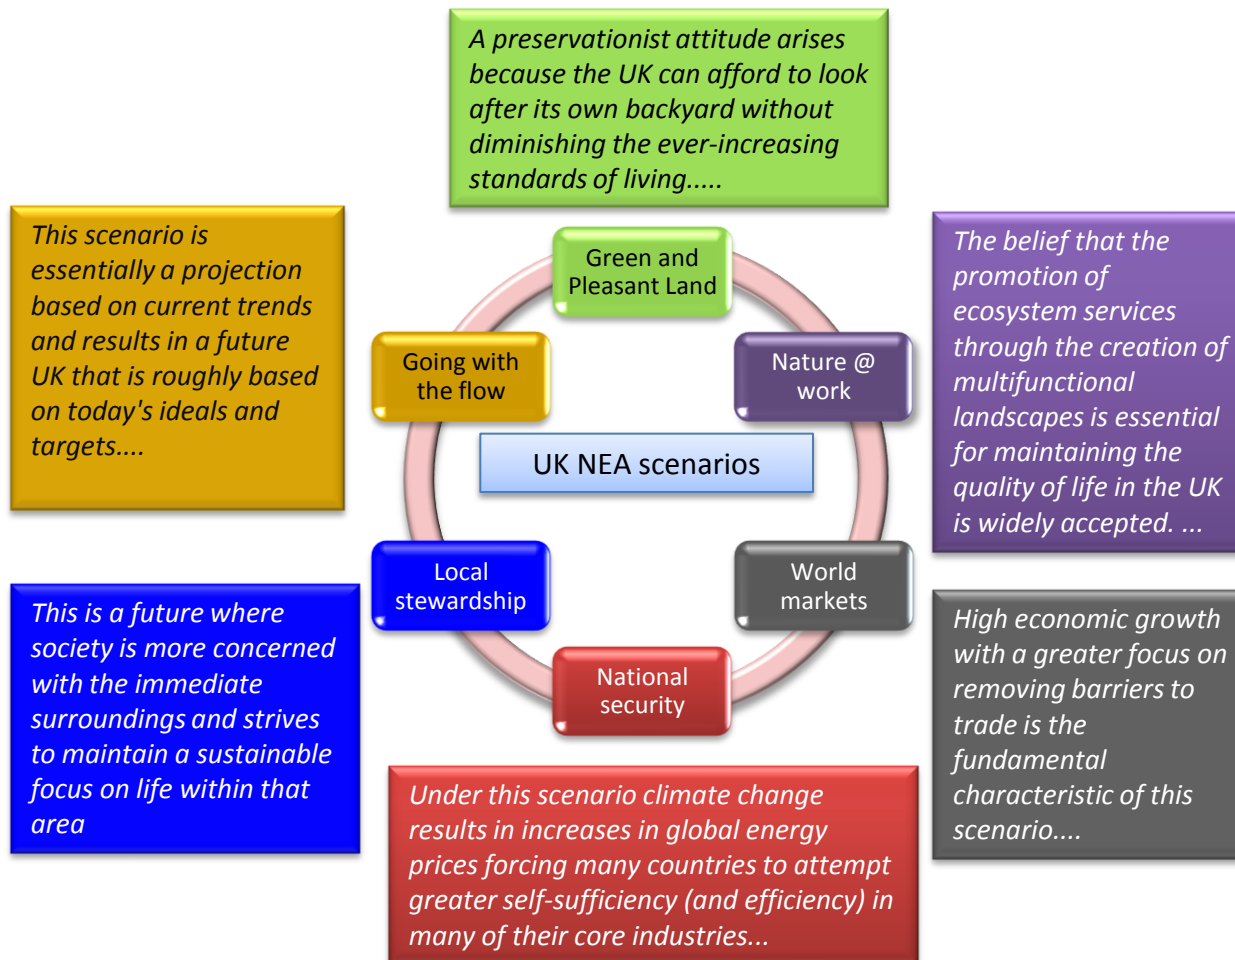

Benefits of joint working with WP7 – minimising stakeholder fatigue etc.

Stakeholder perceptions and views on scenarios after

Clearly differentiated outputs – our focus on methodology and quality of scenarios

The UK NEA scenarios

Timetable

			2012					2013										
Stream	Task	Team input (<u>Lead</u>)	July	Aug	Sep	Oct	Nov	Dec	Jan	Feb	March	April	May	June	July	Aug	Sep	Oct
1 Scenario methods																		
1.1	Developing the functional relationships that link land cover <u>and</u> land use change to service output	Haines-Young																
	1.1.1: <i>Biodiversity and lowland farmed landscapes</i>	Norris, Haines-Young																
	1.1.2: <i>Process-based water models and scenarios</i>	Gosling, Haines-Young, PDRA																
	1.1.3: <i>Representing functional relationships & data sources</i>	Haines-Young, Smith, Madsen, PDRA																
1.2	Refining the socio-economic contexts in which the significance changes in land cover and service output can be understood.	Kass, Haines-Young, Everard, PDRA																
	1.2.1: <i>Ethnographic futures framework & timelines</i>	Kass, Haines-Young, Everard, PDRA																
	1.2.2: <i>Wildcards and scenarios</i>	Aguilar-Millan, PDRA																
	1.2.3: <i>Scenarios and governance responses</i>	Brown, Everard, Kass																
1.3	Extending the range of services considered to include those associated with coastal and marine environments.	Hull, Roberts, Austin, Haines-Young																
2 Scenario applications																		
2.1	Engaging with stakeholders to review the assumptions and outcomes used in the first phase scenarios	Fish, Kass, Potschin, Madsen																
	2.1.1: <i>England, Wales (& Scotland)</i>	Fish, Wavlen																
	2.1.2: <i>Northern Ireland</i>	Christie																
2.2	Downscaling of Scenarios	Haines-Young, Fish, Kass, Smith, PDRA																
3. Synthesis and reporting																		
3.1	Tools for scenario construction and testing	Haines-Young, all																
3.2	Stakeholder perspectives and responses	Haines-Young, all																
Milestones																		
M1	WP6 internal kick-off	UNOTT																
M2	Overall NEA II meeting	WCMC																
M3	Finalise workplan	UNOTT																
M4	Draft report on methods	UNOTT																
M5	Draft report on stakeholder responses	UNOTT																
M6	Draft synthesis report	UNOTT																
M7	First draft of chapter submitted	UNOTT																
M8	Review Meeting	WCMC																
M9	Final draft submitted	UNOTT
