

UK National Ecosystem Assessment

Follow-on

Workshop on Scenarios and Response Options: Questionnaire

It would be helpful if you could give us some feedback on your experience of working with the NEA scenarios, so that we can build on this event in the remaining work of the follow-up phase. Your responses will be treated anonymously and used mainly to make a critical assessment of what has been achieved in the scenario and response option work.

1.	Please describe your professional interest in the NEA. <i>What thematic areas interest you?</i>	
2.	Have you used scenarios tools in your work, and the NEA scenarios in particular? If so what types of application?	Scenarios in general: Yes/No NEA in particular: Yes/No Types of application:
3.	Having worked with the NEA scenarios at the meeting do you find the projections they make generally plausible? <i>By 'plausibility' we mean, if we accept the assumptions made about the drivers, are the projections credible, given what we know about ecosystems.</i>	Yes, generally plausible/Partially plausible/Not really plausible Comment:
4.	Having worked with the NEA scenarios at the meeting are you more likely or less likely to use them in your work?	More likely/less likely/don't know If <u>more likely</u> , comment about potential applications, or <u>if less likely</u> or <u>don't know</u> explain why:
5.	How could the NEA scenarios be developed to make them more useful for your work or for work in general? <i>Please answer even if you may not be using scenarios yourself, because we are interested in the general development of scenario methods.</i>	Suggested development(s):

6.	Did you find the additional, VERGE material helpful in understanding and using the scenarios?	<p>The VERGE material:</p> <ul style="list-style-type: none"> • Contributed greatly to understanding of NEA scenarios/Did not add much • Helped me to think about timelines/Did not help much to think about trajectories <p>Comments:</p>
7.	Did you find the 'wind-tunnelling' tool a useful application of the NEA scenarios? What would be needed to make the tool more useful to decision makers when they are looking at response options?	<p>Useful/Mixed feelings about utility/Probably not useful</p> <p>Comment:</p>
8.	What other policy response options ought to be considered in the follow-up to this workshop?	<p>Suggestions of response options to be considered:</p>
9.	<p>Has working with the NEA scenarios made you think differently about future issues? <i>For example, what new questions about current drivers or possible futures would you like to follow up?</i></p>	<p>Yes/No/Undecided</p> <p>Comment:</p>
10.	<p>Taking the workshop as a whole – did you find the structure of the programme helpful in terms of understanding the NEA scenarios and seeing how they could be used? <i>How could the workshop format have been improved?</i></p>	<p>Helpful/Partially helpful/Not helpful</p> <p>Comments and suggestions for improvements:</p>
11.	<p>This questionnaire is anonymous, but if you are willing to follow it up with a phone interview please add your name.</p>	

Please return the questionnaire at the end of the workshop or by post to: *Jamie Tratalos, Centre for Environmental Management, School of Geography, University of Nottingham, NG7 2RD*
